

KONICA MINOLTA

The essentials of imaging

bizhub 40P

Designed for productivity

Office system bizhub 40P

bizhub 40P, office system

Small footprint big performance

In the new bizhub 40P Konica Minolta has combined high black & white productivity with a compact construction. Flexibility is an added asset in this exceptional printer that comes in different configurations to suit the diverse needs of busy workgroups.

- The bizhub 40P stands for speed and power and produces up to 43 crisp b/w prints per minute, with the first page available after just 9.5 seconds. It incorporates latest Emperon™ technology and features a powerful 500 MHz processor, 128 MB standard memory and Gigabit Ethernet.
- Operation is convenient and straightforward via a full graphics LCD panel in which provides a visual indication of the printer status up close or across the room. The bizhub 40P's user convenience also includes secure printing* and job tracking to facilitate print cost control.
- With its compact yet sturdy design, its impressive productivity and easy operation the bizhub 40P is the perfect printer for all environments with extensive general and professional b/w printing requirements in a minimum of space. The bizhub 40P will easily integrate into e.g. customer service environments, financial departments, logistics providers and other businesses, where printing needs include invoices, monthly reports, order and packing lists, inventories and any other type of documentation.

bizhub 40P 

Living up to highest expectations

Representing the very latest in document processing the bizhub 40P combines the most innovative technology with high compatibility. Versatile media input and output capabilities further enhance its productivity and enable flexible upgrading to changing business requirements.

➔ Advanced hardware, enhanced functionality

- The built-in Emperon™ system provides compatibility not just with PostScript 3 and PCL 6 but a wide range of operating systems and business applications, ensuring the bizhub 40P's seamless integration into virtually any network. Native support of XPS, Microsoft Vista™'s XML paper specification, is also provided*. DPWS (Device Profile for Web Services) makes the bizhub 40P installation fast and easy; and with IPv6 and IPsec support, the bizhub 40P offers latest IT technology.
- Flexible configurations with up to four paper cassettes provide a maximum paper supply of 1800 pages and availability of up to four different paper types, such as media qualities of up to 216 gsm, coloured paper, stationery, forms, etc. Thanks to the face-up output tray that ensures a direct paper path, specialties like packing lists, envelopes, labels and others are processed without hitch.
- Other options enhance the bizhub 40P's performance further: Double-sided printing is automatic with the optional duplexer; and a 500-sheet offset stacker separates multiple prints or different jobs, for the convenient retrieval of prints by various users.

➔ Security and control inclusive

- The bizhub 40P's job accounting functionality facilitates cost control. Details of every print job are tracked, allowing the allocation of printing costs to individual users – a process that can help keep printing costs in check!
- Secure printing is also available*, enabling users to delay printing by first setting a password on their computer, which they then need to enter in the printer display to release their job. Full confidentiality is thus guaranteed.
- PageScope WebConnection provides single device monitoring for everyone. Real-time status information, such as toner levels and printer problems, can be viewed on the PC with the PageScope® Suite tools (HDD or CompactFlash™ card required).

* optional hard disc required
